

**PUBLIC SPACES! RECONNECTING THE CITY**

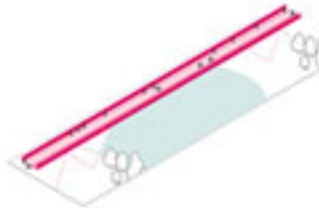

**01-ESCALATOR**

The escalators give the society the chance to overcome all the difficulties that the city has, like hills and the different ground levels. These elements become also public spaces as they make accessible places and streets that couldn't be reached before.

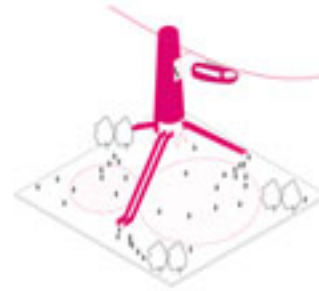

**02-IT'S FOR PEOPLE**

How can we deal with natural frontiers? By using escalators, passages and elevated walking paths systems the area finds a way to integrate different areas that were disconnected before.

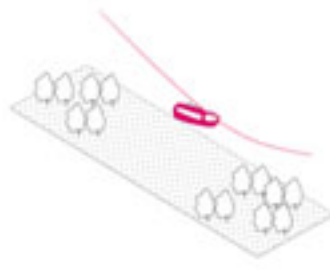

**03-CABLE CAR**

We propose a new way of transport that provides the society a new air path to reach any point of the city. The new elevated grid allows people to avoid traffic jams and have faster communications.

**04-CONNECTIONS**

Public space is an area where urban and technology are combined into a new typology.

**05-THIS IS PUBLIC!**

If we eliminate the ground transport layer, what happens with that space? Giving that space to people is the best way to involve society in urban planning.

**WE LIKE LOGISTICS!**

Actual use level (20%)  
 Number of people per sqm of floor area  
 Ground use occupation level (10%)  
 Number of people per sqm of ground area

People and mobilities  
 How people get to the building for work purposes. This is going to change in public space is going to create the mobility.

**00-AND FOR WHO?**

The machine moves the cargo along the computer. It is possible to attend the demand in every neighbourhood the CAGESP.

**01-DRONE PLACE**

As a drone and an transport system the market can deliver the orders out with the buildings.

**04-IT'S FOR WHO?**

The goods are transported to the user with a drone or through the rail.

**02-UP AND UP?**

Some of the cargo goes through an elevated road which provides the loading to the rest of stations.

**03-ESTIMATED TRANSPORT**

The average load distribution of the cargo depending of the type and destination.

**05-UP PLACE**

Locating the central office in a public space. The different communication and storage has the chance to make public spaces!

**06-READY TO COLLECT**

You will always be informed of the status of your order via (app), knowing when exactly your box is going to be delivered.

**07-GET YOUR FRUITS/VEGETABLES/ WHATEVER YOU NEED**

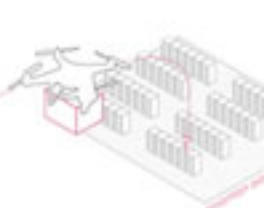

You just have to go to your roof and get the box. It's so simple as that.

**CAGESP IS NOT MADE JUST FOR COMPANIES**  
 You can order whatever you want via the CAGESP online platform that allows you to get the product you want in just minutes!

**AUTOMATIC PROCEDURE**  
 Once the order is made, the automatic built moves the box to one of the platforms, and a drone receives the info and get ready to deliver.

**ROOMTOP DELIVERIES**  
 The drone will look for the rooftop deck you selected to drop the box.

**APP READY TO COLLECT**  
 You will always be informed of the status of your order via (app), knowing when exactly your box is going to be delivered.

**GET YOUR FRUITS/VEGETABLES/ WHATEVER YOU NEED**  
 You just have to go to your roof and get the box. It's so simple as that.
